

AI Drug Innovation Accelerator

From Research to Innovation. From Innovation to Market.

The AI Drug Innovation Accelerator is a specialized acceleration platform focused on artificial intelligence, drug discovery, pharmaceutical technologies, biotechnology, biomedical data, digital health, and related health technologies.

We help researchers, founders, university teams, technology owners, and startups move promising ideas and technologies through development, validation, intellectual property, commercialization, and investment-readiness pathways.

Core Message

We accelerate the next generation of AI-powered medicines and health technologies.

Supporting Statement

We connect scientific research, artificial intelligence, technology, entrepreneurship, industry, and capital to help transform promising innovations into validated and market-oriented ventures.

We Accelerate the Next Generation of AI-Powered Medicines and Health Technologies.

From promising research and emerging technologies to validated ventures, intellectual property, commercialization, and investment readiness.

What We Accelerate

We focus on technologies and ventures at the intersection of artificial intelligence, life sciences, pharmaceuticals, and healthcare.

AI Drug Discovery Artificial intelligence and computational technologies applied to drug discovery and development.	Biomedical AI AI technologies addressing biomedical research, analysis, decision support, and related applications.	Pharmaceutical Technologies Emerging technologies supporting pharmaceutical research, development, manufacturing, and innovation.
Biotechnology Innovative biotechnology platforms, tools, and applications.	Digital Health Technology-enabled solutions addressing healthcare and health-related challenges.	Drug & Biomedical Data Data platforms, databases, knowledge bases, analytics, and computational resources.
AI Models & LLMs Artificial intelligence models, machine learning systems, generative AI, and large language models with relevant scientific or healthcare applications.	Diagnostics Emerging technologies supporting detection, analysis, diagnosis, and related healthcare applications.	University Spin-offs & Technology Research-based technologies, patents, inventions, and university projects with potential for further development or commercialization.

From Research to Innovation. From Innovation to Market.

The Accelerator provides a structured pathway for promising research, technologies, and ventures.

This pathway may differ according to the technology, development stage, sector, and needs of each participating venture.

What We Do

We support the development of promising technologies through a connected ecosystem.

Assessment Understanding the technology, problem, team, development stage, and opportunity.	Development Supporting teams as they strengthen their technology, product, research, and business model.	Validation Helping teams identify and address the evidence, technical, scientific, market, and development requirements relevant to their stage.
Intellectual Property Supporting awareness and development of appropriate intellectual property pathways.	Commercialization Connecting technologies with potential industry, market, licensing, and commercialization pathways.	Investment Readiness Helping qualified ventures prepare for relevant investor and strategic conversations.
Ecosystem Connections Connecting founders, researchers, universities, companies, experts, and strategic partners.		

Who Can Apply?

The Accelerator welcomes applications from qualified:

- Researchers
- University teams
- Founders
- Startups
- University spin-offs
- Technology owners
- Patent holders
- AI teams
- Biotechnology teams
- Pharmaceutical technology teams
- Digital health teams
- Biomedical technology teams

Applicants may be at different stages of development.

Apply to the AI Drug Innovation Accelerator

Have a promising technology, research project, or startup?

We want to hear from teams working on ambitious ideas at the intersection of AI, medicines, biotechnology, pharmaceuticals, and healthcare.

We look for:

Strong Problems Important problems with meaningful scientific, healthcare, pharmaceutical, or market relevance.	Innovative Technology Technology, research, intellectual property, or a differentiated approach with potential for further development.	Evidence Research, proof of concept, prototype, validation, data, market evidence, or other relevant evidence appropriate to the stage.
Committed Teams Founders, researchers, and teams with the expertise and commitment required to develop the opportunity.	Potential for Development A credible pathway toward further validation, commercialization, partnership, licensing, or venture creation.	

How to Apply

- 1

Submit
Complete the online application and provide the requested information.
- 2

Review
The application is reviewed according to the Accelerator's applicable selection process.
- 3

Assessment
Selected applicants may be invited for further discussion, technical assessment, or additional information.
- 4

Selection
Qualified applicants may be invited to participate in an appropriate Accelerator program.
- 5

Acceleration
Selected teams work through a structured development pathway appropriate to their stage and needs.
- 6

Progression
Teams may progress toward validation, intellectual property, commercialization, strategic partnerships, investment readiness, or other appropriate outcomes.
- ☐

Submission of an application does not guarantee acceptance into the Accelerator, funding, investment, commercialization, regulatory approval, or any other outcome.

Application Step 1 — Applicant

Applicant Type
Researcher / University Team / Founder / Startup / Spin-off / Technology Owner / Patent Holder / Other

Applicant Information
Full Name · Position · Organization · Country · Email · Phone · LinkedIn · Website

Step 2 — Company or Project
Company / Project Name · Country · City · Website · Founding Date, if applicable · Team Size · Current Stage · Company Registration Status, if applicable

Current Stage
Research / Concept / Proof of Concept / Prototype / Early Startup / Early Revenue / Growth / Other

Tell Us About the Problem

- What problem are you solving?
- Who experiences this problem?
- Why is this problem important?
- What are the current approaches or alternatives?
- What limitations exist with current solutions?

Tell Us About Your Solution

- What have you developed?
- How does it work?
- What makes your approach different?
- What is the key innovation?
- What evidence do you currently have?
- What remains to be developed?

Technology

Select all that apply: AI / Machine Learning · Generative AI · LLMs · Drug Discovery · Drug Development · Biomedical AI · Biomedical Data · Bioinformatics · Biotechnology · Pharmaceutical Technology · Digital Health · Diagnostics · Medical Technology · Computational Biology · Other

Technology Description
Please describe the core technology in clear technical terms.

Technology Development Stage
Concept / Research / Proof of Concept / Prototype / Validated Prototype / Preclinical / Clinical / Commercial / Other

Intellectual Property

What type of intellectual property do you currently have?
Granted Patent / Patent Application / University IP / Licensed Technology / Proprietary Technology / Trade Secret / Software / Copyright / Know-how / Other / No IP Yet

Additional Information
Patent/Application Number · Jurisdiction · Filing Date · Owner · Licensing Status

Supporting Documents
Upload relevant documentation where appropriate.
Applicants should not disclose confidential information beyond what is appropriate for the application process. Submission of information does not by itself establish an intellectual-property protection or confidentiality arrangement.

Evidence & Validation

Tell us what evidence supports your technology.

Select all that apply: Scientific Research / Published Research / Internal Research / Proof of Concept / Prototype / Technical Validation / Preclinical Evidence / Clinical Evidence / Regulatory Progress / Customer Validation / Market Validation / Revenue / Commercial Deployment / Other

Please describe the most important evidence supporting your technology.

Market Opportunity

Target Market

Who are your target customers, users, or beneficiaries?

Market Need

Why does the market need this solution?

Competition

Who are the relevant competitors or alternatives?

Competitive Advantage

What gives your technology an advantage or differentiation?

Commercialization

What is your current or anticipated route to market?

Business Model

Please describe how the venture creates and captures value.

Revenue

No Revenue / Pre-Revenue / Revenue / Other

Funding

Bootstrapped / Grant / Angel / Venture Capital / Corporate / Other

Funding Raised

Provide the amount and currency, if applicable.

Funding Required

Describe your current funding requirement, if applicable.

Commercial Partners

Please identify relevant existing or prospective partners where disclosure is authorized.

The Team

Tell us about the people developing the technology.

For each founder or key team member:

Name · Role · Background · Expertise · Organization · LinkedIn · Relevant experience

Founder Statement

Why is your team uniquely positioned to develop this opportunity?

Introduce Your Team

Applicants may submit a short video introducing the founders, technology, problem, and vision.

Recommended length

1–3 minutes

Suggested prompt

Tell us who you are, what you are building, the problem you are solving, and why this opportunity matters.

Video submission should be optional unless a specific program requires it.

Programs

The Accelerator offers structured programs designed for different stages and types of innovation.

Accelerator Program — From Research to Market

A structured program for selected ventures seeking to strengthen their technology, validation, business model, intellectual property, commercialization pathway, and investment readiness.

Core Areas: Technology Development · Validation · IP · Business Development · Commercialization · Partnerships · Investment Readiness

Pre-Accelerator — Turning Early Ideas Into Stronger Opportunities

The Pre-Accelerator is designed for promising early-stage projects that require further development before entering a full acceleration pathway.

It may support: Problem definition · Technology development · Early validation · Team development · Market exploration · Business model development · Preparation for acceleration

Research-to-Startup — Turning Research Into Venture Opportunities

A pathway for researchers and university teams exploring how promising research can progress toward technology development, intellectual property, venture creation, and commercialization.

Pathway: Research → Technology → IP → Validation → Startup → Commercialization

AI Drug Discovery Program

A specialized pathway for technologies applying artificial intelligence and computational methods to drug discovery and development.

Potential areas include: Computational Drug Discovery · AI-Assisted Molecular Design · Drug Repurposing · Molecular Modeling · Biomedical Data · Predictive Models · Machine Learning · Generative AI · Scientific AI

The exact scope and eligibility of each cohort or program shall be defined in its official program announcement.

Corporate Innovation — Connect Industry With Emerging Innovation

The Accelerator provides a platform for organizations seeking to engage with emerging technologies, researchers, startups, and innovation opportunities.

Potential collaboration areas include: Technology Scouting · Research Partnerships · Startup Collaboration · AI Solutions · Pharmaceutical Innovation · Biotechnology · Data · Commercialization · Innovation Challenges

Our Companies

Meet the companies developing the future of AI, medicines, biotechnology, and healthcare.

Explore companies participating in the AI Drug Innovation Accelerator ecosystem.

Filter by: Sector · Technology · Stage · Program · Batch · Country

Company Card

Company Name · One-line description · Sector · Technology · Stage · Batch

Company Profile

Every approved public company profile should follow a consistent structure.

[COMPANY NAME] · [One-line description]

Sector: [Sector] · Technology: [Technology] · Stage: [Stage] · Program: [Program] · Batch: [Batch]

About

[Approved company description]

Technology

[Approved technology description]

Founders

[Founder profiles]

Progress

[Approved milestones]

Partnerships

[Approved partnerships]

Public disclosure of funding, valuation, commercial agreements, intellectual property, clinical information, or other sensitive information requires authorization from the relevant company and the Accelerator.

Accelerator Batches — Building the Next Generation of Innovation

Each Accelerator cohort brings together selected companies, researchers, technologies, and founders.

Batch 01

[Program Dates] · [Number of participating ventures — only if verified]

Future batches should follow the same structure: Batch 02 · Batch 03 · Batch 04

The CMS must allow unlimited future cohorts.

Demo Day — Meet the Next Generation of AI Drug Innovation Companies

Demo Day provides an opportunity to showcase participating ventures, technologies, and progress to relevant stakeholders.

Explore the Batch: Companies · Founders · Technologies · Pitch Presentations · Event Information · Investor Registration

 Participation in Demo Day or publication on this website does not constitute an investment recommendation, offer, solicitation, guarantee of funding, or guarantee of commercial success.

For Investors — Discover Emerging Opportunities in AI, Pharmaceuticals and Biotechnology

The Accelerator connects qualified ventures and technology opportunities with relevant investors and strategic stakeholders where appropriate.

Explore Accelerator Companies · Emerging Technologies · University Spin-offs · Commercialization Opportunities · Licensing Opportunities · Demo Day · Strategic Partnerships

Investor Journey: Discover → Explore → Connect → Evaluate Independently

The Accelerator does not replace independent technical, commercial, legal, regulatory, financial, or investment due diligence.

Investor Registration — Connect With Emerging Innovation

If you are an investor or investment organization interested in AI, pharmaceuticals, biotechnology, healthcare, or related technologies, you may register your interest.

Information: Name · Organization · Position · Country · Email · Website · LinkedIn · Investment Focus · Technology Interests · Investment Stage · Geographic Focus · Other Areas of Interest

Registration does not guarantee access to confidential information, investment opportunities, or any particular company.

For Researchers — Have a Promising Research Project?

Your research may have applications beyond the laboratory.

The Accelerator provides a pathway for researchers and university teams to explore:

Research → Technology → IP → Validation → Startup → Commercialization

We Can Help Connect Research With: Technology development · Intellectual property pathways · Industry · Entrepreneurship · Commercialization · Strategic partners · Accelerator programs

Submit Your Technology

You do not need to have a startup to submit a promising technology.

We consider submissions involving:

- Research Projects
- Patents
- AI Models
- Software
- Biomedical Platforms
- Databases
- Pharmaceutical Technologies
- Biotechnology
- Prototypes
- Proofs of Concept
- University Technologies
- Other Relevant Innovations

Technology Submission: Technology Name · Researcher / Owner · Institution · Technology Category · Technology Description · Development Stage · IP Status · Evidence · Potential Applications · Commercial Potential · Supporting Documents · Contact Information

Submission does not guarantee acceptance, acceleration, licensing, investment, commercialization, or other outcome.

For Universities — From University Research to Real-World Innovation

We seek to connect universities with opportunities for research translation, technology development, entrepreneurship, and industry engagement.

Collaboration Areas: Technology Transfer · Research Commercialization · University Spin-offs · Intellectual Property · Industry Partnerships · Research Partnerships · Innovation Programs · Accelerator Programs · Innovation Labs

University Pathway: Research → Technology → IP → Acceleration → Spin-off / Licensing → Commercialization → Market

Partners — Building Innovation Through Collaboration

The Accelerator ecosystem brings together organizations that contribute expertise, technology, research, market access, networks, and other capabilities.

Partner Categories: Strategic Partners · Research Partners · Industry Partners · Technology Partners · Investment Partners · Institutional Partners

Only authorized partnerships should be presented as official Accelerator partnerships.

Become a Partner — Build the Future of Innovation With Us

Organizations may explore collaboration with the Accelerator across:

Research · AI · Pharmaceuticals · Biotechnology · Technology · Data · Commercialization · Industry · Investment · Mentorship · Training

Mentors & Experts — Expertise That Moves Innovation Forward

The Accelerator connects participating teams with relevant expertise across:

- Artificial Intelligence
- Drug Discovery
- Pharmaceutical Sciences
- Biotechnology
- Biomedical Research
- Clinical Development
- Regulatory Affairs
- Intellectual Property
- Commercialization
- Entrepreneurship
- Investment
- Manufacturing
- Market Access

Mentor participation is subject to availability, program requirements, and applicable arrangements.

Alumni — The Network Continues Beyond the Program

Participation in an Accelerator program is the beginning of a longer innovation journey.

The Alumni network will connect founders, researchers, companies, and technologies that have participated in Accelerator programs.

Alumni Profiles: Founder · Company · Batch · Technology · Sector · Achievements · Partnerships · Current Status

Information concerning funding, valuation, revenue, partnerships, or other sensitive matters will only be displayed when authorized.

Resources — Knowledge for Builders and Innovators

Explore resources supporting innovation in AI, drug discovery, biotechnology, pharmaceuticals, and healthcare.

Categories: AI Drug Discovery · Drug Development · Biomedical AI · Biotechnology · Intellectual Property · Regulatory Knowledge · Entrepreneurship · Commercialization · Fundraising · Market Access · Scientific Publications · Guides · Reports · Webinars · Case Studies

News & Insights

Follow the latest developments from the Accelerator ecosystem.

Categories: Accelerator News · Company News · Founder Stories · Research · Technology · Partnerships · Events · Demo Day · Publications · Industry Insights

Events — Connect. Learn. Build.

Discover: Accelerator events · Demo Days · Workshops · Webinars · Investor events · Founder events · Research events · Industry events

Each event should provide: Date · Time · Location / Online · Description · Speakers · Registration

About the AI Drug Innovation Accelerator

The AI Drug Innovation Accelerator is a specialized acceleration platform within the ecosystem of the AI for Drug Innovation Society.

It focuses on connecting artificial intelligence, scientific research, pharmaceutical innovation, biotechnology, entrepreneurship, intellectual property, and commercialization.

The Accelerator provides structured pathways for researchers, founders, startups, university teams, and technology owners seeking to advance promising innovations.

Our Focus

AI · Medicines · Biotechnology · Research · Technology · Entrepreneurship · Commercialization

Our Model

From Research to Innovation. From Innovation to Market.

Why AI Drug Innovation?

The future of medicines and healthcare requires collaboration across disciplines.

The Accelerator brings together:

 **Science**
Scientific research and expertise.

 **Pharma**
Pharmaceutical science and drug development.

 **Entrepreneurship**
Founders, startups, and venture creation.

 **Industry**
Commercial and strategic partnerships.

 **Artificial Intelligence**
AI, machine learning, computational technologies, and data.

 **Biotechnology**
Emerging biological technologies and platforms.

 **Intellectual Property**
Technology and IP pathways.

 **Investment**
Investment readiness and qualified investor connections.

This integrated model is designed to reduce the distance between scientific discovery and real-world application.

Institutional Relationship

The AI Drug Innovation Accelerator operates within the ecosystem of the AI for Drug Innovation Society.

The Society provides the institutional framework within which the Accelerator's activities are developed and delivered.

The Accelerator should not be described on the website as an independent legal entity unless a separate legal entity has been formally established and documented.

For Society information: Visit the AI for Drug Innovation Society →

Contact the Accelerator

Have a question?

Choose the appropriate inquiry: Accelerator Application · Technology Submission · Research Collaboration · University Partnership · Industry Partnership · Investor Relations · Mentorship · Media · General Inquiry

Application Disclaimer

Submission of an application does not guarantee admission to any Accelerator program or any other outcome.

The Accelerator may request additional information or documentation as part of its assessment process.

Applicants remain responsible for the accuracy and completeness of information submitted.

Applicants should avoid submitting confidential information unless the applicable submission process and terms provide an appropriate basis for doing so.

Participation in an Accelerator program does not constitute a guarantee of funding, investment, regulatory approval, commercialization, licensing, revenue, or commercial success.

Important Information

Information presented on this website is provided for general informational purposes and does not constitute investment advice, a recommendation, an offer, or a solicitation to purchase or subscribe to any security or financial product.

Investors should conduct their own independent legal, financial, technical, commercial, scientific, and regulatory due diligence before making any investment decision.

Participation in the Accelerator, inclusion in the company directory, or presentation at a Demo Day does not constitute an endorsement or guarantee of any company, technology, investment, or commercial outcome.

Company Information

Company information published on this website is provided by or approved by the relevant company and/or the Accelerator for public presentation.

Inclusion in the Accelerator's website or portfolio does not constitute an investment recommendation, certification, regulatory approval, or guarantee of commercial performance.

Intellectual Property

The Accelerator respects the intellectual property rights of researchers, founders, universities, companies, and technology owners.

Applicants should consider appropriate intellectual property protection and confidentiality requirements before publicly disclosing sensitive information.

Submission of information through the website does not by itself establish ownership, licensing rights, patent protection, or any other intellectual property right.

AI Drug Innovation Accelerator

From Research to Innovation. From Innovation to Market.

Master Navigation — Final

The developer should use the following navigation without inventing alternative terminology:

Accelerator · Apply · Programs · Companies · Researchers · Investors · Partners · Resources · About

Right-side primary button: APPLY NOW

The Most Important Website Rule

I recommend making the following paragraph part of the developer contract/specification, exactly as an instruction:

The developer shall implement the approved website content supplied by the AI Drug Innovation Society / AI Drug Innovation Accelerator and shall not independently create institutional, scientific, regulatory, financial, investment, legal, partnership, program, company, or performance claims. Where content has not been approved or supplied, the developer shall use a clearly identified placeholder rather than inventing content.

The developer may improve typography, layout, user experience, information hierarchy, accessibility, and technical presentation, but shall not materially alter the meaning of approved institutional content without written approval.

Final positioning

The entire Accelerator website should revolve around one simple proposition:

From Research to Innovation. From Innovation to Market.

And the user should understand the platform in less than 30 seconds:

I have research Submit Your Technology	I have a startup Apply	I want to see companies Companies
I am an investor Investors	I am a university Universities / Researchers	I want to collaborate Partners
I want knowledge Resources		

This gives you the YC-style simplicity you wanted, but with a much more specialized identity around AI + Drug Discovery + Pharma + Biotechnology + Research Commercialization.
