

1. GLOBAL BRAND MESSAGE

Innovation for a Healthier Tomorrow

The AI for Drug Innovation Society is a Saudi non-profit organization focused on advancing the responsible use of artificial intelligence, scientific research, biotechnology, pharmaceutical innovation, and digital technologies to support the development of innovative health and drug solutions.

The Society brings together researchers, academics, innovators, technology developers, healthcare and pharmaceutical stakeholders, entrepreneurs, institutions, and strategic partners to support a connected ecosystem for research, innovation, knowledge, and impact.

- Core Statement

Connecting AI, research, innovation, and people to help shape the future of medicines and health.

HOME — INTRODUCTION

Advancing AI-Driven Drug Innovation

The AI for Drug Innovation Society brings together scientific knowledge, artificial intelligence, research, technology, and collaboration to support innovation across the pharmaceutical and healthcare ecosystem.

Our work connects:

Research → AI → Innovation → Intellectual Property → Collaboration → Impact

We seek to create meaningful connections between researchers, universities, technology innovators, pharmaceutical and biotechnology organizations, startups, investors, and strategic partners.

HOME — OUR ECOSYSTEM

One Ecosystem. Multiple Capabilities.

Drug innovation is no longer developed within a single discipline.

It requires collaboration across science, artificial intelligence, data, technology, intellectual property, industry, investment, and regulatory pathways.

The Society's ecosystem connects:

Universities Research, academic expertise, talent, and knowledge.	Researchers Scientific ideas, discoveries, and emerging technologies.
Artificial Intelligence AI models, computational approaches, data analysis, and intelligent technologies.	Pharmaceutical Industry Drug development, manufacturing, commercialization, and market needs.
Biotechnology Biological innovation, platforms, therapeutic technologies, and translational research.	Startups Entrepreneurship, technology development, and scalable solutions.
Investors Capital, strategic growth, and commercialization opportunities.	Technology Platforms, AI systems, databases, software, and enabling technologies.
Regulatory Ecosystem Responsible development and pathways toward appropriate regulatory engagement.	International Partners Scientific collaboration, knowledge exchange, technology partnerships, and global connections.

HOME — WHAT WE DO

From Knowledge to Impact

The Society works across several interconnected areas:

Research & Innovation Supporting scientific research, innovation, and collaboration.	Artificial Intelligence Advancing the application of AI and computational technologies in drug and health innovation.
Pharmaceutical Innovation Supporting new approaches to medicines, pharmaceutical technologies, and healthcare solutions.	Biotechnology Connecting biotechnology research and innovation with emerging technologies.
Intellectual Property Supporting awareness, development, protection, and pathways for technology and intellectual property.	Entrepreneurship Connecting promising research and technologies with entrepreneurship and commercialization pathways.
Partnerships Building relationships across academia, industry, technology, investment, and institutions.	Knowledge Sharing research, publications, educational resources, reports, and insights.

HOME — AI DRUG INNOVATION ACCELERATOR

From Research to Innovation. From Innovation to Market.

The AI Drug Innovation Accelerator is a dedicated accelerator platform within the Society's ecosystem. It provides a structured pathway for promising research, technologies, AI solutions, intellectual property, prototypes, and specialized startups.

The Accelerator Pathway

What We Accept

- Advanced research projects
- Technologies and platforms
- AI models
- Large Language Models (LLMs)
- Databases
- Knowledge bases
- Patents
- Inventions
- Proofs of Concept
- Prototypes
- Specialized startups

What We Offer

- AI and LLM applications for drug discovery
- Data and technology validation
- Intellectual property support
- Commercialization support
- Connections and ecosystem access
- Talent and expertise

⚠ The Accelerator is presented as part of the Society's ecosystem and should not be represented as a separate legal entity unless such status is formally established. This distinction is specifically required in the Master Requirements.

HOME — PROGRAMS

Programs & Initiatives

The Society develops and supports programs designed to translate knowledge, technology, and innovation into meaningful outcomes.

1 My Medicine, My Way <i>Dawa'i Bi Tareeqati</i> A Society program focused on its approved objectives and activities. Explore Program →	2 The Thousand-Mile Step <i>Khatwat Al Alf Mile</i> A Society initiative designed to support its approved objectives and activities. Explore Program →
3 AI Drug Discovery Training Unit A specialized training initiative focused on developing knowledge and capabilities in artificial intelligence and drug discovery. Explore Program →	4 AI for Drug Innovation Hackathon An innovation program bringing together talent, ideas, technology, and collaboration around challenges in AI and drug innovation. Explore Program →

⚠ These four program names are explicitly identified in the uploaded requirements as programs for which official/authorized content exists. The developer must not add program descriptions, dates, partners, budgets, beneficiaries, or outcomes unless supplied by the Society's approved program documentation.

HOME — IMPACT

Our Impact

We believe that meaningful innovation should create measurable value.

The Society tracks its activities and impact across areas such as:

- Programs
- Beneficiaries
- Members
- Volunteers
- Research projects
- Researchers
- Partnerships
- Startups
- Intellectual property
- Patents
- Products
- Training activities

Impact Statement
Our impact is measured through activities, outputs, partnerships, knowledge, innovation, and the people and organizations connected to our ecosystem.

⚠ **Important Website Rule**
No number should be published unless it has an approved internal source, a reporting period, and an identified responsible owner. This requirement is explicitly stated in the Master Requirements. Therefore, I recommend that the developer initially display categories rather than invented numbers.

THE SOCIETY — About the Society

Who We Are

The AI for Drug Innovation Society is a Saudi non-profit organization dedicated to supporting innovation at the intersection of artificial intelligence, scientific research, pharmaceutical sciences, biotechnology, healthcare, and technology.

The Society provides a platform for collaboration among researchers, academics, innovators, institutions, industry, entrepreneurs, and other stakeholders interested in advancing drug and health innovation.

Our work is centered on connecting knowledge with innovation and innovation with meaningful impact.

Our Vision

To contribute to a connected ecosystem in which artificial intelligence, scientific research, pharmaceutical innovation, biotechnology, and human talent work together to advance the future of medicines and healthcare.

Our Mission

To support research, innovation, collaboration, knowledge development, and responsible application of artificial intelligence in drug and health innovation, while connecting researchers, institutions, innovators, industry, and strategic partners through a collaborative ecosystem.

Our Objectives

The Society's objectives include supporting:

- Scientific Research**
Advancing research related to artificial intelligence, pharmaceuticals, biotechnology, healthcare, and drug innovation.
- Innovation**
Encouraging the development of innovative technologies, platforms, models, and solutions.
- Collaboration**
Connecting researchers, universities, industry, technology organizations, startups, and strategic partners.
- Knowledge**
Supporting the creation, exchange, and dissemination of scientific and educational knowledge.
- Technology Translation**
Supporting pathways that connect research and technology with intellectual property, development, and commercialization.
- Talent Development**
Developing capabilities in AI, drug discovery, pharmaceutical innovation, biotechnology, and related fields.
- Entrepreneurship**
Supporting pathways through which promising research and technologies may progress toward entrepreneurship and market applications.
- Societal Impact**
Contributing to innovative solutions that can create scientific, economic, and social value.

☐ Final legal wording of the Society's objectives must be replaced by the approved statutory wording where required.

Our Values

Scientific Integrity

We value evidence, scientific rigor, transparency, and responsible research.

Responsibility

We promote responsible development and application of artificial intelligence and emerging technologies.

Impact

We seek meaningful and measurable outcomes from our activities.

Innovation

We encourage new ideas, technologies, approaches, and solutions.

Human-Centered Innovation

We place people, health, and societal value at the center of innovation.

Collaboration

We believe meaningful progress is achieved through connected communities and multidisciplinary cooperation.

Knowledge

We support learning, knowledge exchange, and continuous development.

Our Areas of Focus

- 1 Artificial Intelligence
- 2 Drug Discovery
- 3 Pharmaceutical Innovation
- 4 Biotechnology
- 5 Biomedical Data
- 6 Digital Health

- Healthcare AI
- Research & Innovation
- Intellectual Property
- Technology Transfer
- Entrepreneurship
- Commercialization
- Talent Development
- Strategic Partnerships

Our Strategic Direction

The Society seeks to develop an integrated ecosystem connecting:

Our Ecosystem Model

01	02	03
Society defines needs and priorities	Research generates knowledge	AI transforms data and knowledge into new possibilities
04	05	06
Innovation creates technologies and solutions	IP & Validation strengthen technology development	Commercialization connects innovation with real-world applications
07		
Impact		

Leadership — Board of Directors

The Society is governed through its approved governance structure.

Board Members

For each approved public profile:

[Name] [Position / Board Role]

[Approved Biography]

⚠ No biography, personal information, board term, photograph, or other information should be published unless approved for public disclosure. The website requirements specifically require public leadership information to be limited to approved information.

Executive Management

The Society's executive management is responsible for implementing approved strategies, programs, activities, and institutional operations.

Organizational Functions

- Executive Management
- Programs
- Accelerator
- Research & Innovation
- Membership
- Partnerships
- Communications & Media
- Other approved departments and units

☐ The final organizational chart must reflect the Society's approved organizational documents.

Governance & Transparency — Our Commitment

📌 This should be one of the strongest pages on the entire website.

The Society is committed to transparency, accountability, responsible governance, and compliance with applicable regulatory requirements.

We seek to maintain clear institutional structures, documented policies, responsible decision-making, appropriate disclosure, and transparent communication with our stakeholders.

Governance

The Governance section may include approved:

- Basic Regulation
- Governance Framework
- Board of Directors
- Committees
- Organizational Structure
- Policies
- Internal Regulations
- Procedures

Transparency & Disclosure

Where applicable and approved for publication, the Society provides access to relevant institutional information, including:

- Institutional disclosures
- Governance information
- Approved reports
- Annual reports
- Financial reports
- Policies

Document Center

The Document Center provides access to approved public institutional documents.

Categories

- Regulations
- Policies
- Procedures
- Reports
- Governance
- Financial Reports
- Research Publications
- Programs
- Institutional Documents

Each document should display:

Field
Title
Document Type
Year
Version
Issue Date
Last Updated
Language
Download

☐ Only approved/current public versions should normally be displayed.

Research & Innovation

Turning Knowledge into Possibility

Research is at the heart of innovation.

The Society seeks to connect researchers, scientific knowledge, artificial intelligence, data, technologies, and industry to support new approaches to medicines and healthcare.

Explore

- Research Projects
- Researchers
- Publications
- Technologies
- Innovation Projects
- Intellectual Property
- Patents
- Databases
- Research Collaboration
- Technology Transfer
- Translational Research

☐ These categories follow the structure defined in the Master Requirements.

Knowledge Center

Knowledge for Innovation

The Knowledge Center brings together scientific, technical, educational, and institutional knowledge related to AI, drug innovation, biotechnology, healthcare, and pharmaceuticals.

Explore

- Research
- Reports
- White Papers
- Publications
- Studies
- Guides
- Articles
- Educational Resources

Knowledge Areas

- AI & Drug Discovery
- Biotechnology
- Healthcare AI
- Pharmaceutical Innovation
- Biomedical Data
- Digital Health

Search the Knowledge Center

- Search

- Filter by Year
- Filter by Author
- Filter by Category
- Download

Join the Society — Become Part of the Ecosystem

Membership provides an opportunity to connect with a community interested in artificial intelligence, scientific research, pharmaceutical innovation, biotechnology, healthcare, and related areas.

Why Join?

Membership may provide access to approved Society activities, opportunities, knowledge, events, and community engagement according to the Society's approved membership framework.

Membership

- Membership Categories
- Eligibility
- Membership Benefits
- Application
- Renewal
- Frequently Asked Questions

Apply for Membership →

 **Important**
The website must use the Society's approved membership categories, eligibility requirements, fees, rights, and benefits. These must not be invented by the developer.

Volunteer With Us

Your Time Can Help Build Innovation

The Society welcomes qualified individuals interested in contributing to its activities and initiatives.

Volunteer opportunities may include:

- Scientific activities
- Research
- Events
- Innovation programs
- Communications
- Community activities
- Technical activities
- Educational activities

Volunteer: Explore Opportunities · Apply to Volunteer

Partnerships — Innovation Through Collaboration

The Society believes that meaningful innovation requires collaboration across disciplines and institutions.

We seek to build relationships with organizations that can contribute knowledge, technology, expertise, resources, networks, or opportunities to the ecosystem.

Partnership Areas

Academic Partnerships	Research Partnerships	Industry Partnerships	Technology Partnerships
Strategic Partnerships	Investment Partnerships	Government / Institutional Partnerships	International Partnerships

Become a Partner — Build the Future of Drug Innovation With Us

We welcome collaboration with organizations interested in advancing research, artificial intelligence, pharmaceutical innovation, biotechnology, healthcare, and technology.

Partnership Interests — Please select:

- Academic Partnership
- Research Partnership
- Industry Partnership
- Technology Partnership
- Strategic Partnership
- Investment
- Startup Collaboration
- International Collaboration
- Sponsorship, where applicable

Button: Submit Partnership Request

Investment & Growth

Connecting Innovation With Opportunity

The Society's ecosystem may connect promising:

- Technologies
- Startups
- Research projects
- Intellectual property
- Commercialization opportunities
- Industry collaborations

with relevant strategic and investment stakeholders, subject to the applicable structure and approvals.

Explore

- Innovation Opportunities
- Startups
- Technologies
- IP Opportunities
- Commercialization
- Strategic Collaboration

 **Important wording**
The website should distinguish investment readiness and connections from any regulated investment activity.

Our Impact — Creating Meaningful Value

The Society seeks to create scientific, technological, economic, and social value through its programs, research, partnerships, knowledge activities, and innovation ecosystem.

Our Impact Areas

Research	Innovation
Talent	Programs
Partnerships	Startups
Intellectual Property	Training
Knowledge	Community

Impact Dashboard

The website may display verified metrics when approved.

Every published metric must have:

Source + Reporting Period + Responsible Owner

as required by the website specification.

Media Center

Latest From the Society

The Media Center provides official news, announcements, events, publications, interviews, and other approved communications.

The Society's Core Message

Across the website, the developer should consistently communicate one central institutional idea:

The AI for Drug Innovation Society connects artificial intelligence, scientific research, pharmaceutical innovation, biotechnology, technology, talent, and partnerships to support the development of innovative solutions for medicines and healthcare.

And the ecosystem should always be visually understandable as:

Content Control — Critical

I would put this at the end of the document as a contractual instruction to the developer:

The website developer shall use the content supplied by the AI for Drug Innovation Society as the authoritative source for institutional website content. The developer shall not independently create, modify, expand, interpret, or publish institutional claims relating to the Society's legal status, objectives, governance, regulatory position, licenses, programs, partnerships, membership, financial information, impact statistics, government relationships, or official approvals.

Where approved information has not yet been supplied, the developer shall use a clearly identified content placeholder and shall not invent replacement text or factual information.

All Arabic and English institutional, legal, governance, regulatory, and official content shall be subject to Society approval before publication.

This is particularly important because your existing Master Requirements explicitly make content accuracy a critical contractual requirement and prohibit the developer from inventing statistics, partnerships, programs, membership categories, regulatory approvals, government relationships, or legal terminology.

My recommendation for the next step

We now have two separate documents to create:

Document 1 — Society AI for Drug Innovation Society — Master Website Content This response is the first complete English content framework.	Document 2 — Accelerator AI Drug Innovation Accelerator — Master Website Content For the Accelerator, I would go considerably deeper than the Society because it is intended to function like a YC-style digital accelerator platform. It should include the exact public copy for: Home → Apply → Programs → Companies → Batches → Demo Day → Researchers → Submit Technology → Investors → Investor Registration → Universities → Partners → Mentors → Alumni → Resources → About including the actual application questions, company-profile template, investor page wording, program descriptions, and founder journey. That second document should be written so the developer has almost zero discretion over what the Accelerator website says, while retaining flexibility only for UI/UX and technical implementation.
--	---
